Air Sampling for Toxic Substances

November 5-6, 2008

Jacksonville, FL— Hosted by Atlantic Marine

COURSE OVERVIEW

This two day program provides a thorough overview on industrial hygiene air sampling techniques. The course objective is for the attendees to receive an understanding of proper air sampling methods and techniques for valid sampling results. Laboratory sessions will provide extensive hands on time with various air sampling and calibration equipment. Informative lectures and useful handouts will provide the background material needed to perform air sampling and calibration procedures properly.

Topics include:

- ✓ Correlating Appropriate Sampling Equipment w/Situations
- ✓ Recordkeeping & Chain of Custody
- ✓ Types & Properties Contaminants
- ✓ Regulations, Guidelines, Consensus Standards
- ✓ Using Resource Guides
- ✓ Interpreting & Using Air Sampling Data

PROGRAM FACULTY

Kenneth W. Oldfield, CIH, MSPH is a Health and Safety Instructor for the UAB, Center for Labor Education and Research, and specializes in air surveillance and computer applications for safety and health programs. He has applicable experience in environmental consulting and industrial hygiene sampling. Kenny has co-authored several textbooks on safety and taught throughout the US. He brings real life experiences mixed with textbook knowledge to the program.

INFORMATION/ACCOMMODATIONS

This workshop is being hosted by Atlantic Marine located at 8500 Heckscher Drive, Jacksonville, Florida 32226.
