The Core Elements of Project Management in Public Health

Instructor: Dr. Andrew Rucks Ph.D.

This course provides awareness of and an introduction to the process of project management. The course contains eight modules that will define project management and offer an overview of the critical project management tasks of defining project scope; establishing tasks and milestones; sequencing tasks; exploring the concept of efficiency; establishing timelines; scheduling tasks and resources; and monitoring progress.

Learning Objectives

- Be aware of the key processes of project management
- Be able to define the scope of a project
- Differentiate between project tasks and milestones
- Define elementary project timelines
- Be aware of the complexity of scheduling projects
- Be able to understand the essential requirement of monitoring project progress

Competencies

- Bioterrorism and Emergency Readiness
 - Identify limits to own knowledge/skill/authority and identify key system resources for referring matters that exceed these limits.
- Core
 - Recognizes how the data illuminates ethical, political, scientific, economic, and overall public health issues
